

Climate, Technology, and the Future of the Amazon

Go beyond the headlines to understand how carbon and climate change are affecting the greatest rainforest in the world.

Ahead of the UN Climate Conference (COP26), discover the answer to key questions surrounding climate and the world's largest rainforest: Is the Amazon truly moving from a carbon sink to a carbon source? How are protected areas and indigenous territories faring as key measures for combating climate change? How is climate change affecting Amazonian species and local people? Find out at this 90-minute Q&A fireside conversation. Simultaneous translation available in English and Spanish.

AGENDA

 Wednesday, October 27, 2021	 Time: 2:00 – 3:30 p.m. EST	 bit.ly/amazontec21
---------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------

TIME	TOPIC	PRESENTERS
2:00 - 2:03 p.m.	General Welcome	John Beavers, Amazon Conservation Executive Director [USA]
2:03 - 2:08 p.m.	Opening Remarks	Carlos Nobre, Senior Researcher Institute for Advanced Studies, University of São Paulo [Brazil]
